POST SECONDARY

Robotics

Grants to launch hands-on robotics classes and competitive teams, free virtual robotics challenges, and online lessons.

Music

A project with Georgia Tech's EarSketch. Students compose music in Python. Features popular artists and contests.

Industry

Original projects highlighting ways popular brands and global problems use computer science to solve problems.

AFE program

Free curriculum and professional development to offer a CS Course. You will be eligible for our annual AFE Teacher of Year Award & other benefits to help you teach.

Project-based learning

Inspiring, standards-aligned content to help teachers engage their students in doing something interesting with CS. Some are built into AFE Program CS courses as well as accessible on their own.
